

PROJECT REPORT

CAMPUSFIX

Campus Issue Reporting and Resolution Project

1. Introduction

CampusFix is a Java-based application through which the students can report any campus-related issue. This application not only helps the students report the issues but also helps the administrators track, search, update, and manage the issues in the campus.

2. Objectives

The objectives of the project are:

To give an easy platform to the students for reporting the campus issues.

To track the status of the reported issues.

Automate the process of assigning the priority to the issues.

Help the administrators to control and manage the complaints.

Avoid the repetition of the complaints.

Give the basic statistics about the issues.

3. Features

Student:

Registration

Login

Report an Issue

View My Issues

Search Issues

Upvote Issues

Track Issue Status

Admin:

Login

View All Issues

Search Issues

Update Issue Status

View Statistics

4. Technologies Used

Java is the main coding language used for the development of the application. Swing library of Java is used to develop the GUI of the application. ArrayList and File handling concepts are used to store the issues. GitHub is used to host the project.

5. Project Structure

User.java

Student.java

Admin.java

Issue.java

IssueManager.java

FileManager.java

Main.java

LoginFrame.java

StudentDashboard.java

AdminDashboard.java

6. Working

The working of the application can be described in the following manner:

Login

Student/Admin Dashboard

Report/Manage Issue

Priority Assigned

Issue Tracked

Resolved

The status of the issues goes through the following transitions:

Reported → Verified → Assigned → In Progress → Resolved

7. OOPs Concepts Used

Classes and Objects

Encapsulation

Inheritance

Constructor

Polymorphism

Method Overriding

8. Screenshots

Login Page

Student Dashboard

Report Issue Page

Admin Dashboard

9. Future Scope

The future scope of the project includes the addition of MySQL to the project to make the data storing a bit easier. The images can also be added to the project. The application can also get notification features and advanced analytics. Moreover, a mobile version of the application can also be developed.

10. Conclusion

CampusFix is a perfect application for the students to report and track the issues. The project not only demonstrates the practical knowledge of the Java programming language but also concludes the practical implementation of the Object-Oriented Programming concepts.
